## OBJECTIVE

As a front-end developer with a background in customer support, I have gained valuable problem-solving and communication skills that have helped me excel in the development of interactive web applications using HTML, CSS, and JavaScript. With one year of experience in web development, I have become a fast learner and a result-driven developer who is passionate about ensuring website responsiveness and accessibility. My ability to interact effectively with customers has also contributed to my success in delivering projects that meet the needs of users and exceed their expectations.

## SKILLS

- Skilled in using HTML, CSS, JavaScript, Typescript, and React.js to develop effective web solutions.
- Experience in working with Fetch and REST APIs to fetch and manipulate data.
- Version control with Git/Github, code editing with VS Code, and debugging with Chrome Dev Tools.
- Basic knowledge of SQL with MySQL.
- UX/UI design skills using Figma and Illustrator.
- Basic understanding of object-oriented programming (OOP) concepts.
- SEO optimization skills to increase website visibility.
- Project management skills with Trello and Jira.

## EXPERIENCE

### Frontend Developer (Student Intern)

2021 - 2022

Mate Academy, Ukraine

- Developed SEO-optimized web pages and landing pages with an adaptive design based on the study of the customer's business processes using HTML, CSS, JavaScript, and React.js.
- Developed apps and UI elements such as pagination, filters, sliders, tabs, forms, etc. using JS and React
- Stay up to date with new technologies and completed 2 courses in front-end development.
- 70+ algorithms on the Mate platform.

## PROJECTS

**Eco Cosmetics** — an adaptive Landing page (Technologies: JavaScript, HTML, CSS, Sass (SCSS), BEM).

[Demo](#) [GitHub code](#)

- Improved SEO by optimizing meta descriptions for higher search engine visibility.
- Ensured adaptability across various screens through responsive design.
- Implemented tabs in JavaScript to organize content and improve user experience.
- Created form validation in JavaScript to ensure accurate input from users.
- Designed clickable links and animated images for a dynamic user experience.

**React ToDo App** — a to-do app written in React (Technologies: React, TypeScript, LocalStorage, HTML, CS).

[Demo](#) [GitHub code](#)

- Implemented functionality to add new todos to the application.
- Developed a feature to delete todos, either individually or all completed todos at once.
- Created filters to allow users to view todos by different parameters, such as showing all, active, or completed todos.
- Designed a counter to display the number of not completed todos.
- Developed a feature to toggle the completed status of all todos using the 'toggleAll' checkbox.
- Utilized local storage to save the state of the application for a seamless user experience

**Bose** — a responsive Landing page (Technologies: HTML, CSS, Sass (SCSS), BEM, Grid).

[Demo](#) [GitHub code](#)

**2048** — the game is written in pure JavaScript (Technologies: JavaScript, HTML, CSS).

[Demo](#) [GitHub code](#)

**Creative Bakery** — a responsive Landing page (Technologies: HTML, CSS, Sass (SCSS), BEM).
